Aspiring Computer Science and Software Engineering professional and self-driven learner with growing skills in web development and programming. Passionate about building practical projects using Python, JavaScript, React, and Tailwind CSS. Highly motivated to learn, adapt, and contribute to tech solutions.

PROJECTS & EXPERIENCE

Freelancer Service Platform (Mini Fiverr)   2025
Team Project

- Developed a mini freelancing marketplace inspired by Fiverr, where users can post services and hire freelancers.
- Built using React, Tailwind CSS, Firebase, and Python (for backend logic).
- Implemented authentication, CRUD functionality, and a simple API layer for handling user data and services.
- Focused on UI/UX design, data flow, and responsive layout for seamless user interaction.

To-Do App   2025
Practice Project

- Built a task management app using React, allowing users to create, mark, delete, complete, and time their tasks.
- Added a dark/light mode toggle for theme customization using state management.
- Implemented localStorage to preserve user data and theme preferences across sessions.

Portfolio Website   2025
Personal Project | 2025

- Designed and developed a personal portfolio using React and Tailwind CSS to showcase projects and growing web development skills.
- Configured a contact form that allows visitors to send messages directly to Gmail using EmailJS, enabling instant replies from within the app.
- Focused on creating a responsive, modern interface optimised for both mobile and desktop.
